### SIGNIFICANT EVENTS/ACTIVITY:

#### Cal EOC Incident – 2014 Drought (No Change)

The lack of winter rain and snowfall has resulted in drought conditions throughout the State. Some local jurisdictions are implementing mandatory conservation orders. Reservoir levels are down significantly from where they should be on average for this time of year. Severe impacts to municipal water supplies, agriculture (plants and livestock) and firefighting capabilities are

likely in store for the State over the next few months. The Governor has established a Drought Task Force to oversee and coordinate the response to this event.

The Task Force continues to be in very close contact with local jurisdictions and state agencies to monitor the health of state's water, agriculture, and economy. On 01/03/14, the state conducted its first snow survey of the wet season and found more bare ground than snow. Statewide the snowpack water content is just 20 percent of average for this time of year.

Update 01/12/14: The Task Force has compiled a list of expectations, actions, impacts, funding sources and implementation timeframes by participating agencies/departments for a Governor's Brief on Monday, 01/13/2014.

### **Cal EOC Incident - Influenza 2014 (No Change)**

California is seeing an accelerated increase in flu activity over the past few weeks. While influenza activity varies from year to year and is unpredictable, California generally sees an increase in cases in late December or early January and influenza activity usually peaks in February or March. According to CDPH surveillance indicators, influenza activity has been increasing steadily since Mid-December and is now considered to be widespread. The H1N1 strain appears to be the predominant strain so far this flu season and is one that is contained in the current flu vaccine. Vaccination is recommended for everyone six months of age and older, but is particularly important for those persons at higher risk of severe influenza, like pregnant women, obese persons and persons with certain underlying medical conditions.

CDPH and EMSA activated the Medical and Health Coordination Center (MHCC) at noon on January 10, 2014 in response to an increase in influenza-like illness (ILI) and medical surge occurring throughout California.

CDPH and EMSA will distribute a weekly Public Health and Medical Situation Report.

**The next CDPH Flu update will be Friday, January 17.**
